

To the Commission for Patents:

I am outraged over the IFN-
patenting of "nonnaturally-occurring"
GMO animals. Please reconsider
Patent # 6,924,413 which you
have issued to BPL Inc. for
genetically engineering rabbits,
who are sentient beings capable
of feeling pain and suffering like
fellow mammals (including us
human beings), to be born with
damaged eyes. This is morally
reprehensible and another step
toward de-valuing life, nature
and any compassionate sensibility.
A fellow mammal is not merely a
"composition of matter,"

Public
Citizen

as you have deemed!
